

# A First-Time Letter To 'Dear Abby'

By Karl Duff

The following letter was sent in to "Dear Abby" last week following her inquiry of readers to let her know what they thought was the greatest problem of our nation.

Los Angeles, CA 90069

Dear Abby,

The nation's primary problem is sexual immorality. It robs young men of courage and wisdom and robs young women of ever knowing if they are loved. It causes role reversal in the family. Couples become more easily dissatisfied with their partners, seldom bonding to each other or finding the faithfulness essential for stable families. Insecurity is passed to offspring. Abortion feeds off it and weakened ability to deal with other moral questions. It breeds sexual perversion. It is eating the heart out of America.

100% of STD's are the result of sexual immorality. Widespread sterilization of women and disillusion of our young teens is resulting in increased suicide rates four times greater in young girls (ages 11-14) than boys.

The two largest federal social costs in America are for unwed mothers and AIDS/HIV research, both primarily the result of sexual immorality and the ruination of manhood.

The Bible explains man's fallen nature and identifies God's only solution. It calls sexual immorality "the only sin that is against our own body". But who believes and searches the Bible for foundational truths such as this?

**Karl from Port Orchard Washington**

P.S. I'll send you under separate cover a book, "*Restoration of Men*", the first 50 pages of which explains everything above in biblical terms and could enhance your helpful counsel to many. KMD
