

Chips Anyone?

By Donna Wasson

April 2014

Note from Pastor Kevin Lea: Although this technology will ultimately lead to the biblically prophesied “Mark of the Beast,” a chip implant is not actually “The Mark” that damns the souls of those who take it. Please see our handout titled, [The Coming National ID Card, Will it be the “Mark of the Beast?”](#)

It’s all SO slick. Presented in benign, pretty packages, it appears innocent and helpful; designed to streamline your time and make your life oh-so-easy. Yes my friends, the indoctrination has begun in earnest.

Revelation 13:16-17 “And he causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads: And that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name.”

Technology in and of itself is a good thing. In the last hundred years, mankind has gone from largely relying on the horse and buggy, to putting a man on the moon and returning him safely to earth. Today, with our smartphones, we hold more computer power in our hands than all the computers NASA used for that moon mission. Amazing, isn’t it!

The engineers and scientists would have salivated over the capabilities of a smartphone back then! But to us, it’s just a necessary and enjoyable tool of our everyday lives. Even some elementary school kids have smartphones.

In *Daniel 12:4* the angel of the Lord told the prophet, “*But thou, O Daniel, shut up the words, and seal the book, even to the time of the end: many shall run to and fro, and knowledge shall be increased.*” That statement has come to fruition in our generation.

According to Ask.com, up until 1900, the world’s knowledge doubled every century. By the end of WW II, it was said to have doubled every 25 years. However, because of the computer age and the internet, mankind’s knowledge can double in as little as 1.5 years. This can be a double edged sword, though.

People are so plugged into their phones and internet they are beginning to lose interest in interpersonal relationships and group activities. Next time you go to a restaurant, look around you and watch the other diners. Most are ignoring their tablemates and staring mutely into their small, electronic screens. But smartphones, iPads, GPS and OnStar are just the start.

The Powers That Be, the Globalist elite who are hell bent on destroying America and merging all governments into a one world system ala the New World Order, must have a way to simplify their future control over several billion people. They need to be able to regulate commerce, healthcare, law enforcement issues, employment and even monitor the ranks of the slave class for signs of dissent against their upcoming tyrannical power. Get ready to be romanced by the RFID chip.

Presently, Radiofrequency Identification ‘chips’ are about 1/3 larger than a grain of rice. They make use of wireless non-contact radio frequency electromagnetic fields to transfer data to readers for the purpose of automatically identifying and tracking an object. The information can be read, recorded or even rewritten.

According to Wikipedia, the RFID chips contain “at least two parts: an integrated circuit for storing and processing information, modulating and demodulating a radio-frequency (RF) signal, collecting DC power from the incident reader signal, and other specialized functions; and an antenna for receiving and transmitting the signal. The tag info is stored in a non-volatile memory. The RFID tag (chip) includes either a chip-wired logic or a programmed or programmable data processor for processing...”
