

Genesis 7:13-8:14, Aug 4, 2019, S-1344-KL

Genesis 7:11 In the six hundredth year of Noah's life, in the second month, the seventeenth day of the month, on that day all the fountains of the great deep were broken up, and the windows of heaven were opened. 12 And the rain was on the earth forty days and forty nights.

Canopy Theory It was first proposed by atheist Isaac Newton Vail in 1874, but adopted, without credit, and promoted, by Henry M. Morris, Jr. and John Whitcomb in 1961 in their otherwise important book, *The Genesis Flood*.¹⁰ [For a discussion of these problems, see <https://www.creation-science.com/onlinebook/FAQ32.html>]

Gen 7:13 On the very same day Noah and Noah's sons, Shem, Ham, and Japheth, and Noah's wife and the three wives of his sons with them, entered the ark — 14 they and every beast after its kind, all cattle after their kind, every creeping thing that creeps on the earth after its kind, and every bird after its kind, every bird of every sort. 15 And they went into the ark to Noah, two by two, of all flesh in which is the breath of life. 16 So those that entered, male and female of all flesh, went in as God had commanded him; and the Lord shut him in.

Gen 7:17 Now the flood was on the earth forty days. The waters increased and lifted up the ark, and it rose high above the earth. 18 The waters prevailed and greatly increased on the earth, and the ark moved about on the surface of the waters. 19 And the waters prevailed exceedingly on the earth, and all the high hills under the whole heaven were covered. 20 The waters prevailed fifteen cubits upward, and the mountains were covered.

Gen 7:21 And all flesh died that moved on the earth: birds and cattle and beasts and every creeping thing that creeps on the earth, and every man. 22 All in whose nostrils was the breath of the spirit of life, all that was on the dry land, died. 23 So He destroyed all living things which were on the face of the ground: both man and cattle, creeping thing and bird of the air. They were destroyed from the earth. Only Noah and those who were with him in the ark remained alive. 24 And the waters prevailed on the earth one hundred and fifty days.

Gen 8:1 Then God remembered Noah, and every living thing, and all the animals that were with him in the ark. And God made a wind to pass over the earth, and the waters subsided. The fountains of the deep and the windows of heaven were also stopped, and the rain from heaven was restrained.

Gen 8:3 And the waters receded continually from the earth. At the end of the hundred and fifty days the waters decreased. 4 Then the ark rested in the seventh month, the seventeenth day of the month, on the mountains of Ararat. 5 And the waters decreased continually until the tenth month. In the tenth month, on the first day of the month, the tops of the mountains were seen.

Gen 8:6 So it came to pass, at the end of forty days, that Noah opened the window of the ark which he had made. 7 Then he sent out a raven, which kept going to and fro until the waters had dried up from the earth. 8 He also sent out from himself a dove, to see if the waters had receded from the face of the ground. 9 But the dove found no resting place for the sole of her foot, and she returned into the ark to him, for the waters were on the face of the whole earth. So he put out his hand and took her, and drew her into the ark to himself. 10 And he waited yet another seven days, and again he sent the dove out from the ark. 11 Then the dove came to him in the evening, and behold, a freshly plucked olive leaf was in her mouth; and Noah knew that the waters had receded from the earth.

Gen 8:12 So he waited yet another seven days and sent out the dove, which did not return again to him

anymore. 13 And it came to pass in the six hundred and first year, in the first month, the first day of the month, that the waters were dried up from the earth; and Noah removed the covering of the ark and looked, and indeed the surface of the ground was dry. 14 And in the second month, on the twenty-seventh day of the month, the earth was dried.

[Frequently Asked Questions > Does Recently Declassified Data Falsify Plate Tectonic Theory?]

Does Recently Declassified Data Falsify Plate Tectonic Theory?

Ocean floors constitute 70% of earth's solid surface. They were largely unexplored between 1957 and 1970, when the plate theory was developed. It was frequently said that we knew more about Mars than about the ocean floor. As a result, the PT primarily attempts to explain features on the ocean floor, was developed in the blind, without the data needed to formulate it o then was plate tectonics accepted with enthusiasm?

A Brewing Crisis. Before PT, the only theory that tried to explain Earth's major surface features, especially the obvious jig-Americas with the bulge of Africa, was the 1912 continental drift theory. It claimed, as its name implies, that the jig-saw fit was: continents drifted apart. No one knew why a supercontinent broke apart or how the pieces could move. Did thousands of miles plow through thousands of miles of solid rock? Why couldn't Earth-science experts explain the fit that everyone could plainly s have read pages 108-414, now understand all that—and much more.)

The year 1957-1958 was designated, with much publicity, as the "International Geophysical Year," a year in which sci cooperating countries would conduct studies addressing festering questions about the earth. Adding to the drama, the Soviet Sputnik (Earth's first man-made satellite) in orbit in 1957, a monumental achievement that alarmed the entire free world. The Congress, fearful that the United States was falling behind in science and technology, threw vast amounts of money into sev efforts, one of which was to better understand the ocean floor. (Another was to promote the teaching of evolution.)

Problems also reigned in geology classrooms. One very experienced geology professor of that time, Dr. Douglas A. Block, frequ how embarrassed he and other geology professors felt walking into class knowing students would ask obvious questions profess

A SUMMARY OF TECTONIC GLOBALONEY

by N. Christian Smoot

written by Ellen J. McHenry

NOTE: I was able to contact Mr. Smoot and let him know that I was writing this summary. He gave permission for its distribution as long as it is not-for-profit. He understands that there is no intent to plagiarize or take credit for any of the ideas or passages quoted. Mr. Smoot would like to make the reader aware of his more recent book, Marine Geomorphology, (2015), which is formatted like a textbook (not a paperback) and has many illustrations and data charts.

PLEASE ALSO NOTE: This is not an analysis; it is merely a summary. I leave analysis to the reader.

Introductory page: Smoot's definition of "globaloney": a word used by students when they are being sold shares of the Bronk-

* **RSR Interviews Dr. Walt Brown:** Real Science Radio's Bob Enyart interviews Dr. Walt Brown on the accepted dogma of plate tectonics which theory claims that the crust of the earth has broken up into many plates which allegedly subduct under each other causing earthquakes, volcanoes, and those amazing ocean trenches. None of that, however, is true.
