

# The Flood of Noah

- Why The Flood is an important topic
- Why we need answers
- What The World believes
- What Major Creation Science Ministries Believe caused the Flood
- Hydroplate Theory Explanation for the Flood

# The Flood of Noah

## Why is it important?

If Genesis is wrong, why believe the rest?

Jesus said,

*For if you believed Moses, you would believe Me; for he wrote of Me. But if you do not believe his writings, how will you believe my words?*

John 5:46–47

# Why we Need Answers

- Many Christians are not swayed or troubled by evolutionary theories...
- But some attribute their loss of faith to hearing deceptive “convincing evidence” against a global flood or for macro evolution.
- However, as we will see, the convincing evidence is actually on the side of a literal global flood and divine creation.

# What The World Believes

Earth & Life (result of big bang and slow evolution):

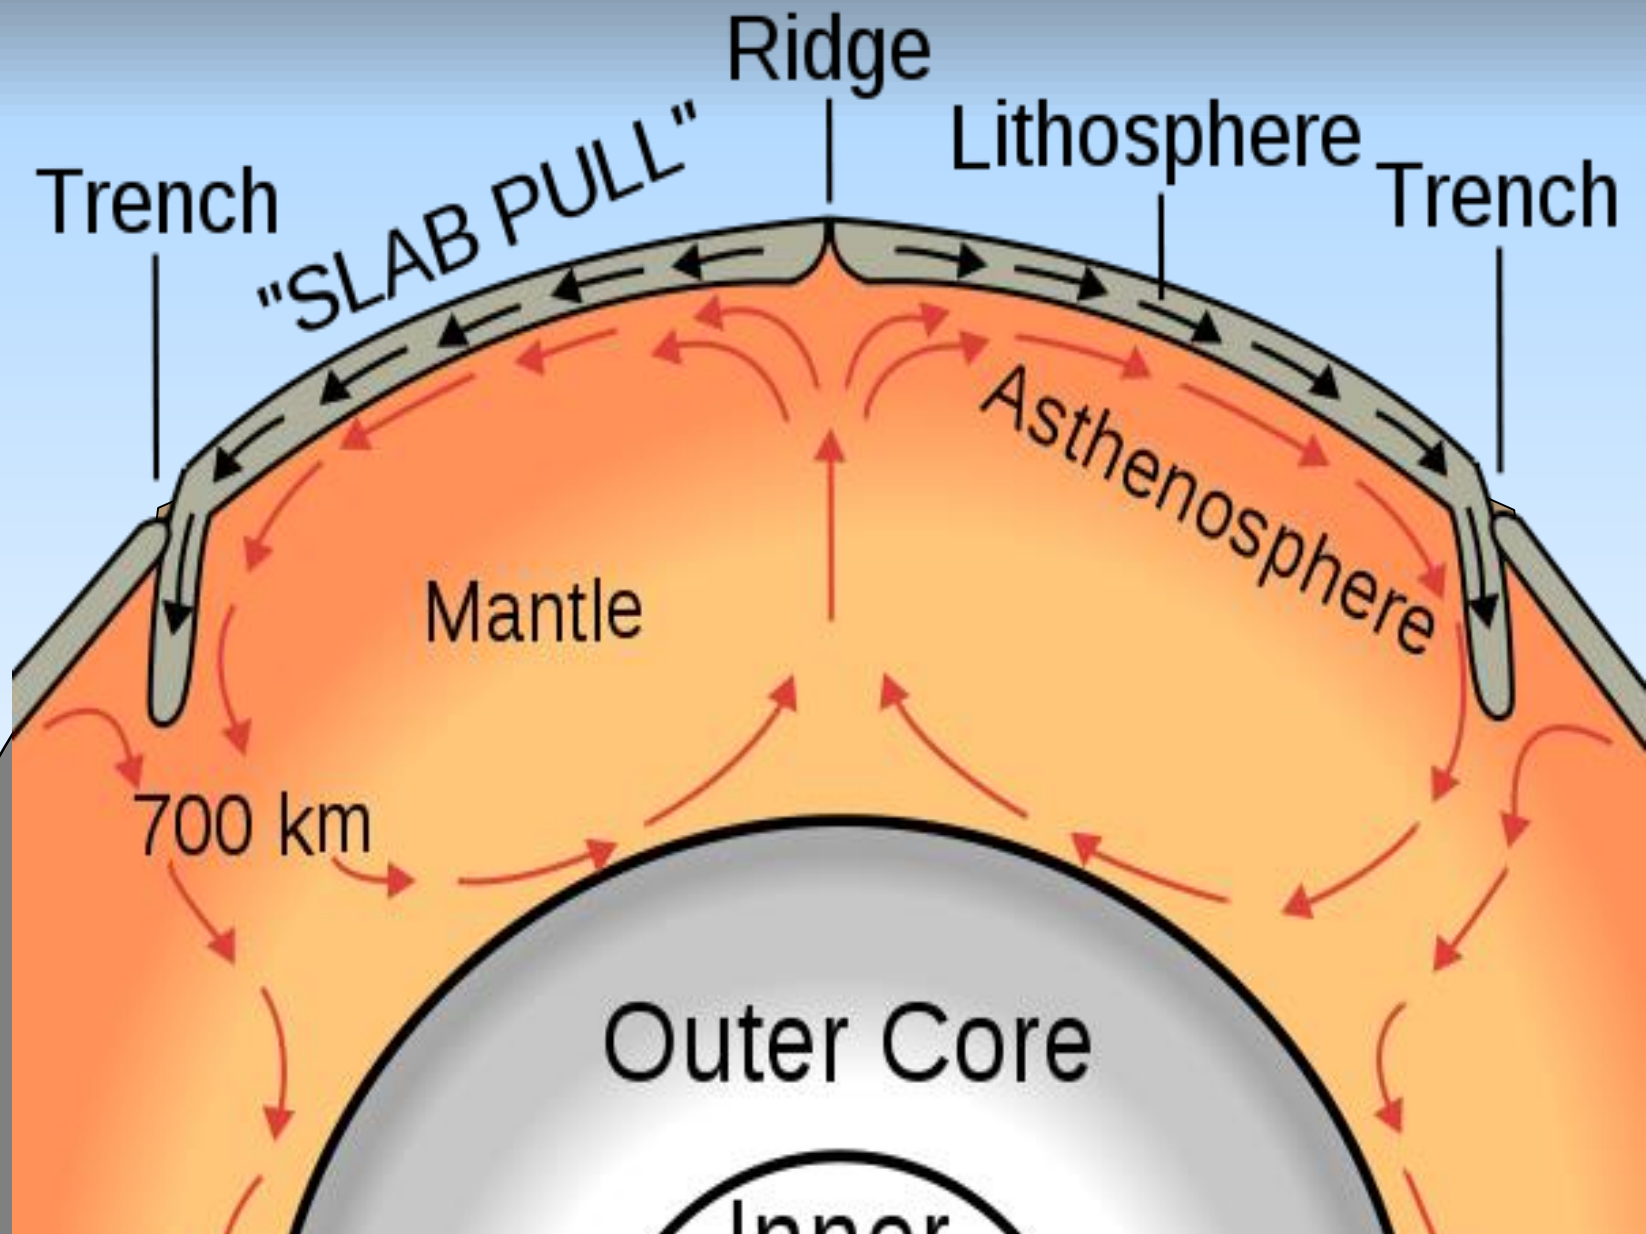

- The Universe is ~14 billion years old
- The Earth is ~4.5 billion years old
- Life began ~3.5 billion years ago
- Life is the product of Evolution over time
- Fossils interpreted to be showing the slow history of Evolution on Earth
- No Global flood

# What The World Believes:

Earth's physical features (result of movements without a scientific explanation of how):

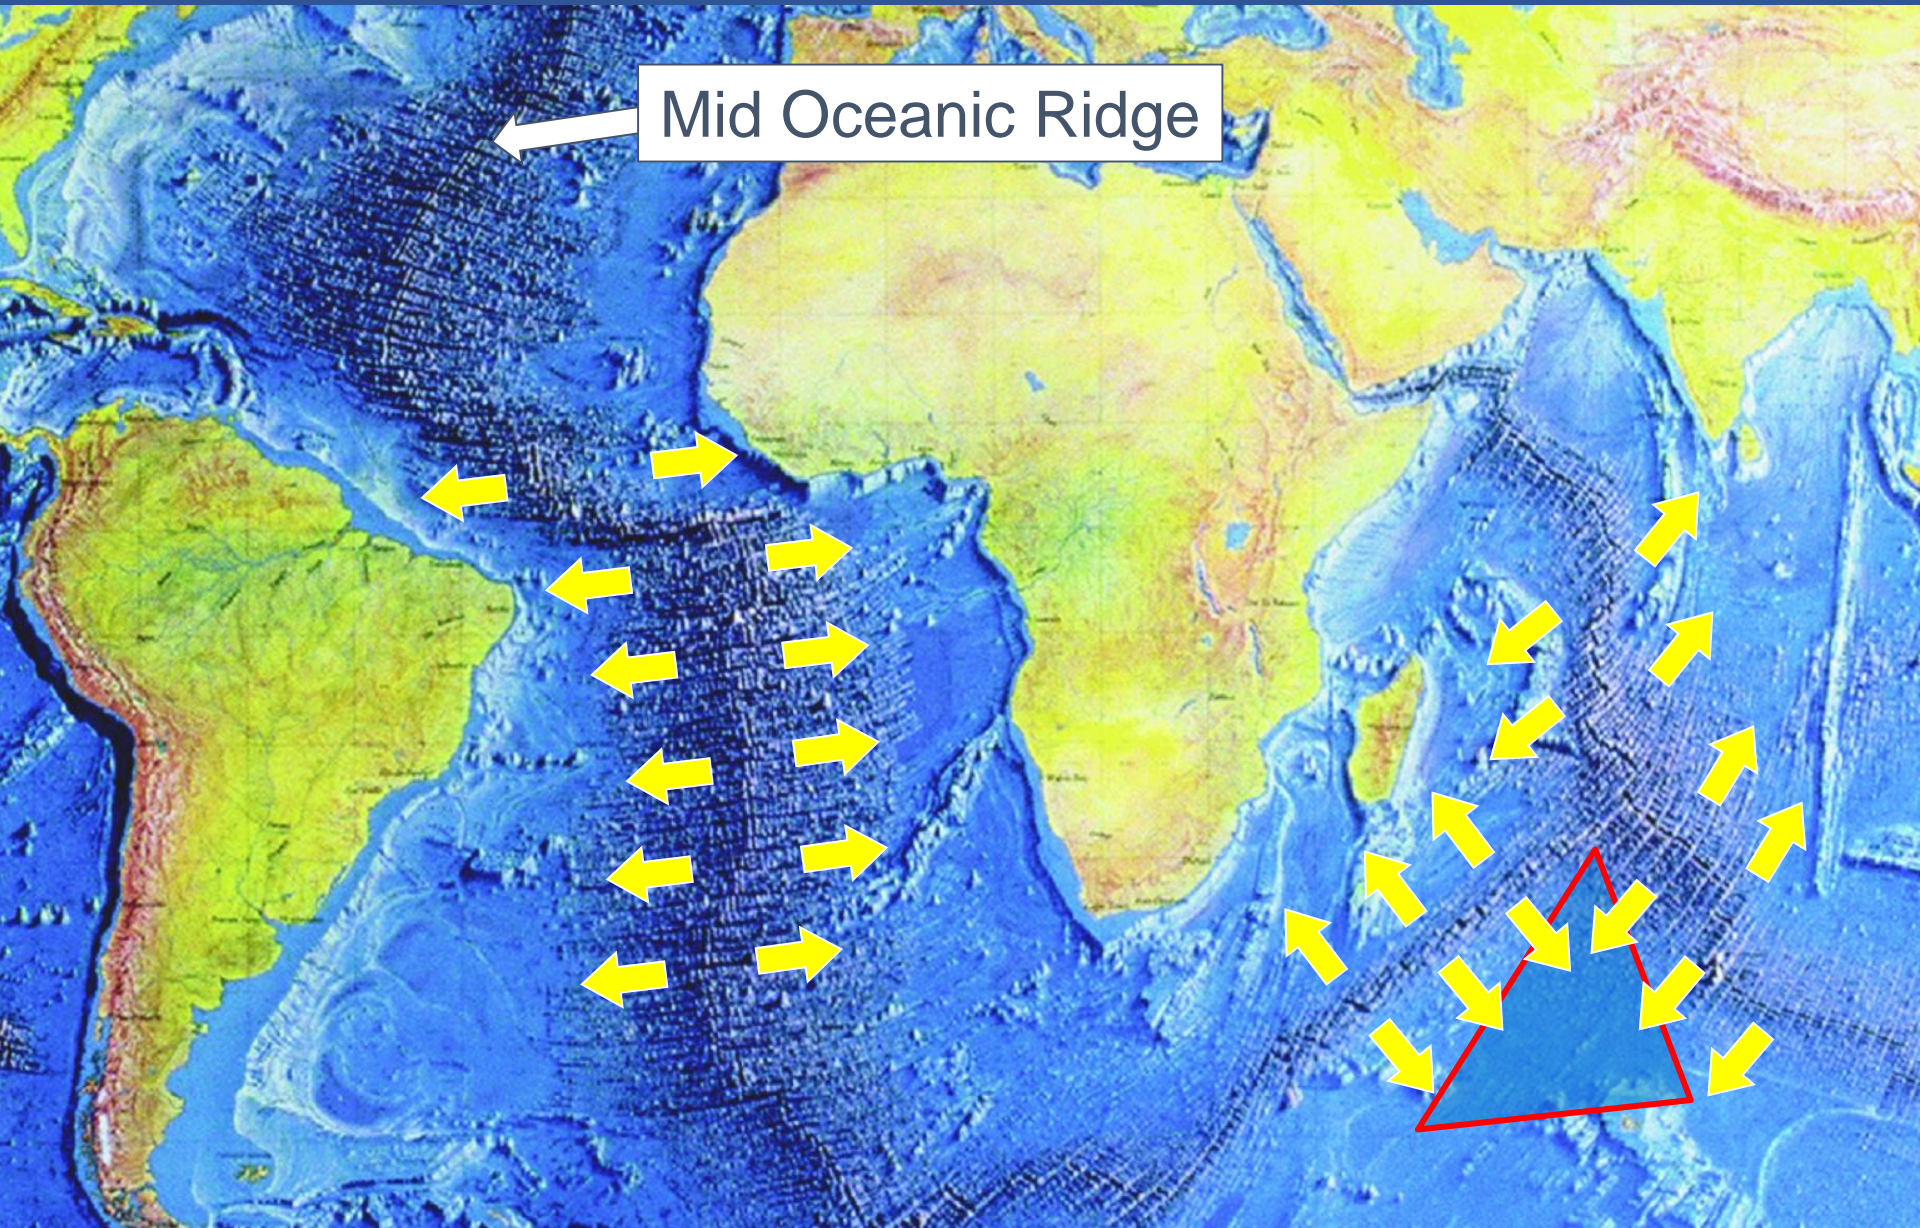

- Continent shapes supposedly show they were once joined
- Continents are slowly moving due to Sea Floor Spreading or Plate Tectonics
- Slow moving plates cause earthquakes and create mountains, volcanos, ocean trenches

[ [Frequently Asked Questions](#) > [Does Recently Declassified Data Falsify Plate Tectonic Theory?](#) ]

## Does Recently Declassified Data Falsify Plate Tectonic Theory?

Ocean floors constitute 70% of earth's solid surface. They were largely unexplored between 1957 and 1970, when the plate theory was developed. It was frequently said that we knew more about Mars than about the ocean floor. As a result, the PT primarily attempts to explain features on the ocean floor, was developed in the blind, without the data needed to formulate it or then was plate tectonics accepted with enthusiasm?

**A Brewing Crisis.** Before PT, the only theory that tried to explain Earth's major surface features, especially the obvious jig-saw fit of the Americas with the bulge of Africa, was the 1912 continental drift theory. It claimed, as its name implies, that the jig-saw fit was continents drifted apart. No one knew why a supercontinent broke apart or how the pieces could move. Did thousands of miles plow through thousands of miles of solid rock? Why couldn't Earth-science experts explain the fit that everyone could plainly see? [Have read pages 108-414](#), now understand all that—and much more.)

The year 1957-1958 was designated, with much publicity, as the "International Geophysical Year," a year in which scientific cooperating countries would conduct studies addressing festering questions about the earth. Adding to the drama, the Soviet Sputnik (Earth's first man-made satellite) in orbit in 1957, a monumental achievement that alarmed the entire free world. The Congress, fearful that the United States was falling behind in science and technology, threw vast amounts of money into several efforts, one of which was to better understand the ocean floor. (Another was to promote the teaching of evolution.)

Problems also reigned in geology classrooms. One very experienced geology professor of that time, Dr. Douglas A. Block, frequently how embarrassed he and other geology professors felt walking into class knowing students would ask obvious questions professors

## A SUMMARY OF TECTONIC GLOBALONEY by N. Christian Smoot

written by Ellen J. McHenry

NOTE: I was able to contact Mr. Smoot and let him know that I was writing this summary. He gave permission for its distribution as long as it is not-for-profit. He understands that there is no intent to plagiarize or take credit for any of the ideas or passages quoted. Mr. Smoot would like to make the reader aware of his more recent book, Marine Geomorphology, (2015), which is formatted like a textbook (not a paperback) and has many illustrations and data charts.

PLEASE ALSO NOTE: This is not an analysis; it is merely a summary. I leave analysis to the reader.

**Introductory page:** Smoot's definition of "globaloney": a word used by students when they are being sold shares of the Brook-

# Search for on Kgov.com

U.S. Navy scientist, N. Christian Smoot, an evolutionist, spent 32 years precisely mapping the ocean floor. His book, *Tectonic Globaloney: Closing Arguments* (Author House Press, 2012), describes discoveries on the ocean floor that falsify sea floor spreading (PT). Smoot, a veteran of 67 cruises, was responsible for declassifying some of this data for use outside the U.S. Navy. He says he “devoutly believed” the plate tectonic theory, but now knows it is “baloney” or “tectonic globaloney.”

From the back cover of his book:

*Forty-five years after the synthesis of the plate tectonic hypothesis, much newer and better information has been gathered by the seagoers of the world. Contrary to popular opinion among earth scientists, the purveyors of plate tectonics are the present-day snake oil salesmen.*

From the back cover of his book:

*[Plate tectonics] is fraught with misinformation and misconceptions. It is in need of a massive make-over. Mid-ocean ridge spreading does not occur universally, especially in Iceland and the North Pacific basin. Deep earthquakes do not define a descending slab; in fact, do not even occur in most places along the trenches. Therefore, subduction does not occur. Continental drift is a figment of overly active imaginations.*

## Plate Tectonics: Subduction Doesn't Happen

\* **RSR Interviews Dr. Walt Brown:** Real Science Radio's Bob Enyart interviews Dr. Walt Brown on the accepted dogma of plate tectonics which theory claims that the crust of the earth has broken up into many plates which allegedly subduct under each other causing earthquakes, volcanoes, and those amazing ocean trenches. None of that, however, is true.

\* **RSR's Flood Landing Page:** All of our global flood resources (interviews, articles, books, videos) are collected for you in one place at

about the Earth is Based on  
the Big Bang Theory

But is there something  
other than the Big Bang  
that better explains the  
Universe/Earth?

# Yes!

## Why Is the Universe Expanding?

<https://www.creationscience.com/onlinebook/FAQ14.html>

- To answer this question, we will first look briefly at some relevant Scriptures. Then we will examine specific scientific evidence and compare two possible explanations
- At least 11 times, the Bible says that God “stretched out” or “stretches out” the heavens.

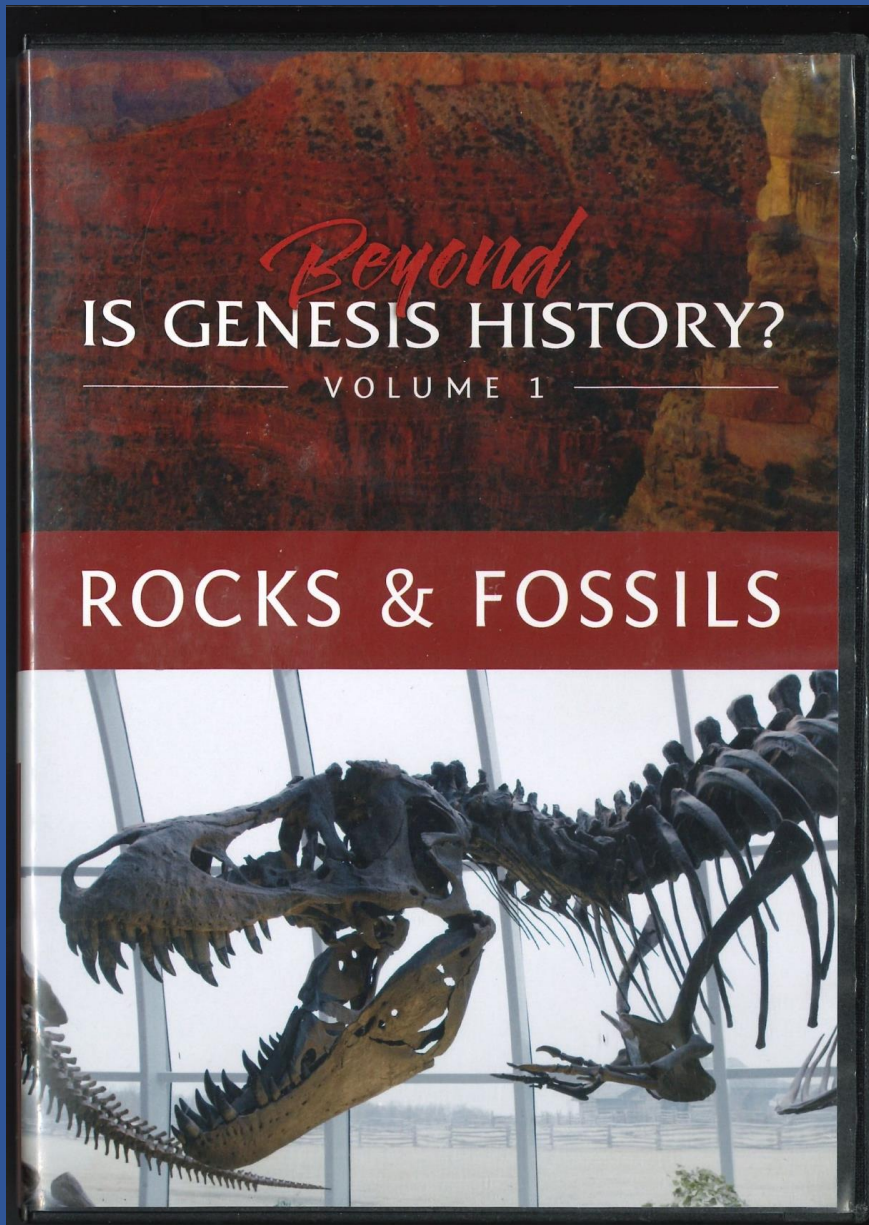

# What Some of the Major Creation Organizations Believe Caused the Flood

They use same Unscientific Plate Tectonic Assumptions that Evolutionists Use Except they believe it Happened in Fast Speed Just Thousands of Years Ago:

- Called Catastrophic Plate Tectonics or CPT
- Fountains of magma instead of water

- Requires Multiple Miracles
- Not Biblical – Local Tidal Waves instead of Global Flood, etc.
- Multiple Scientific Impossibilities
- Answers in Genesis (AiG), Institute for Creation Research (ICR) and others have been shown these problems but this theory is still featured in their books, DVDs and museums

Watch from 4:00 to 4:50 to see the  
fountains of lava view

- At first shows what looks like fountains of water coming up at the rupture – copying Dr. Brown's HPT
- But then shows hot magma from inner earth coming up creating boiling that sends seawater fountains into the air – Impossible!
- Goes on to say the magma turns over the ocean floor for 150 days creating tidal waves – would have boiled all the oceans killing all life and Noah's family

**The new curriculum is here!**

Our primary activity is the presentation of seminars on a wide variety of topics that promote the biblical view of origins. We also produce DVDs and other material that have the same goal. Additionally, we offer two travel adventures - "safaris" - that are creation-oriented.

Could you answer these questions?:

- 1 - Does science actually support evolution?
- 2 - Is "creation" a science theory?
- 3 - How long were the "days" of creation?

# Evidence of Rapid Deceleration

Sullivan River in southern  
British Columbia, Canada

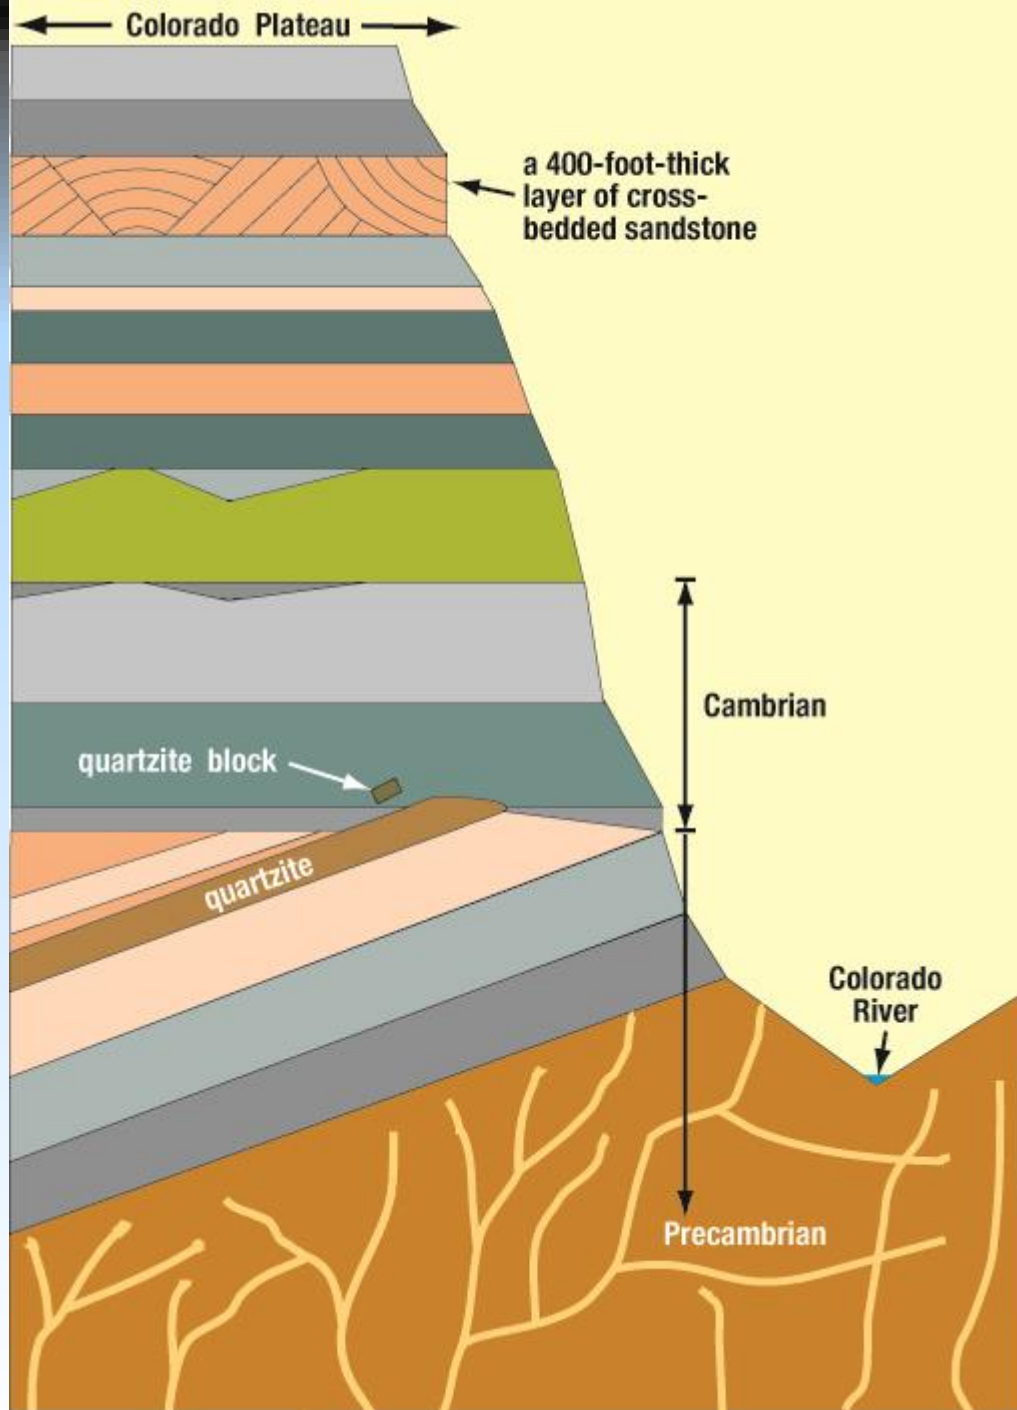

# Evidence of Rapid Deceleration

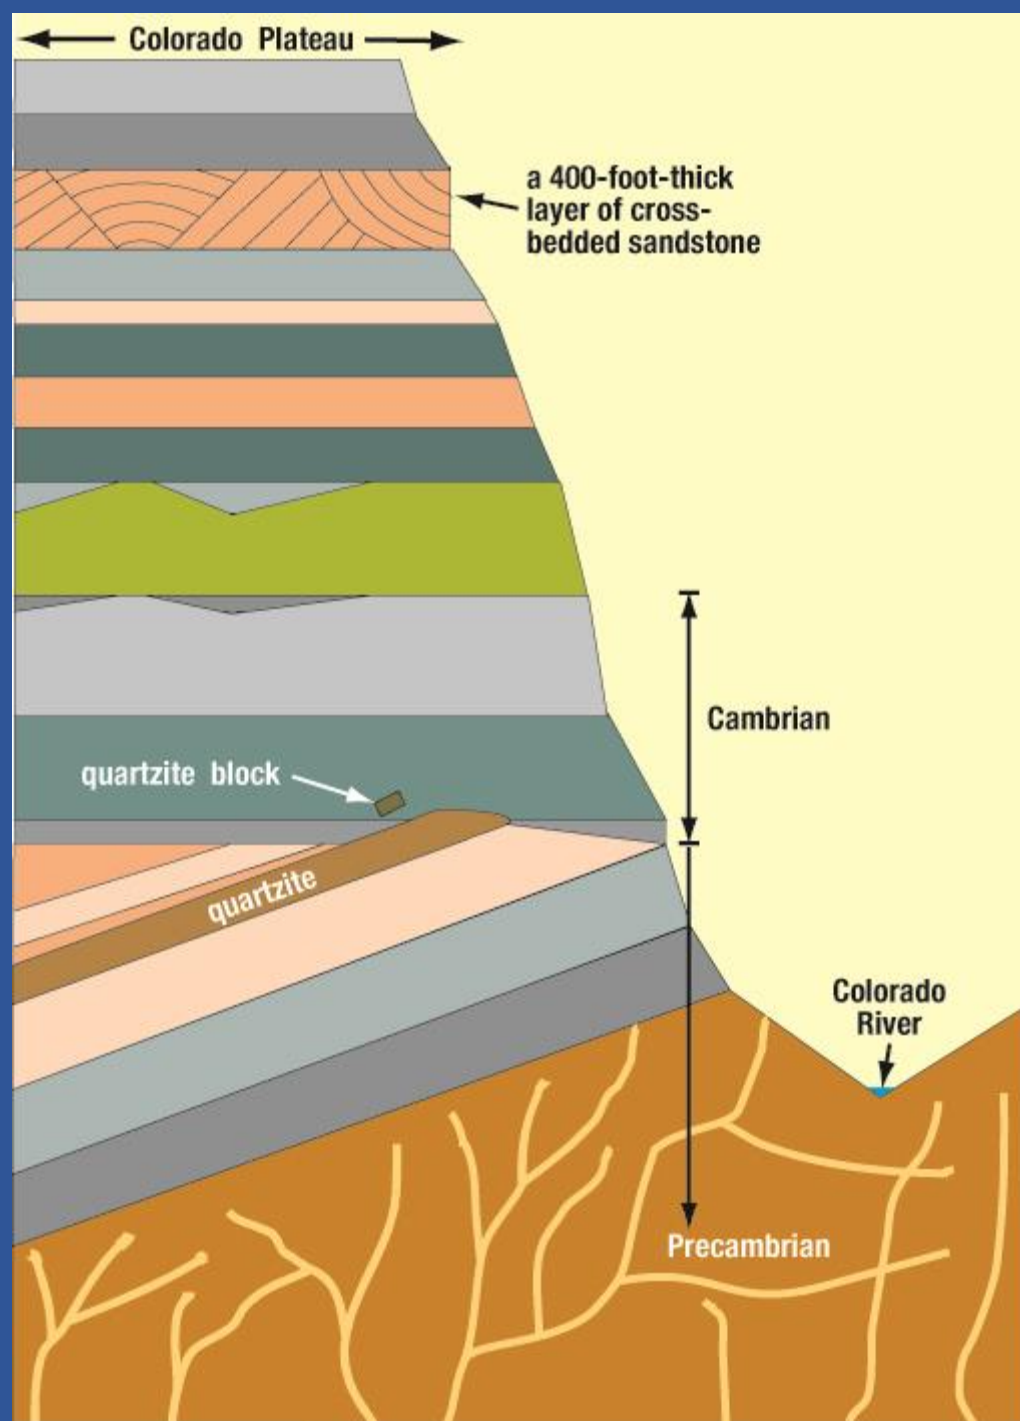

This fact destroys the evolutionary geological column explanation, Plate Tectonics (slow or fast) and can only be explained by the HPT

Dr. Brown's Online Book has Chapters Dedicated to a Scientific Explanation for the Following:

- *The Grand Canyon (pages 215–247)*
- *Oceanic Trenches, Earthquakes, and the Ring of Fire (pages 153–190)*
- Frozen Mammoths (pages 267–298)

- Liquefaction – Origin of Strata and Layered Fossils (pages 194–204)
- Limestone (pages 259–264)
- Comets (pages 301–336)
- Asteroids, Meteoroids and TNOs (pages 336–363)
- Earth's Radioactivity (pages 378–414)

# The Grand Canyon (pages 215–247)

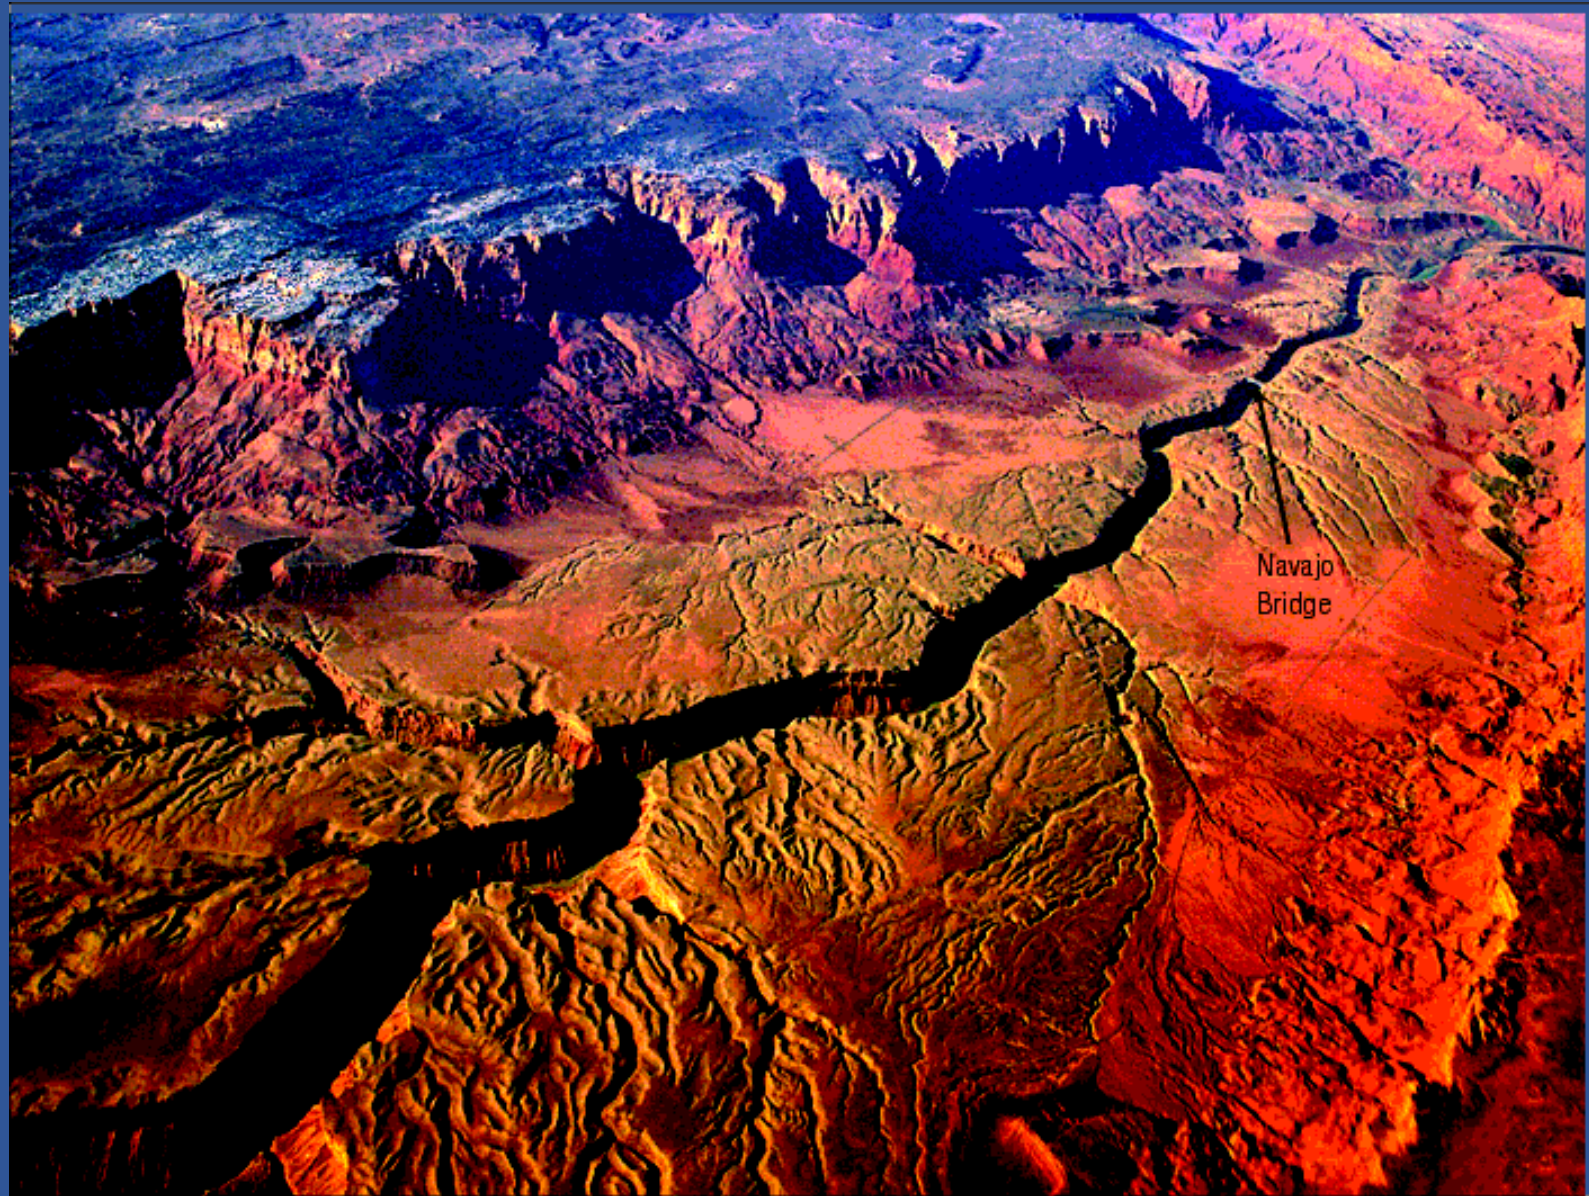

# The Grand Canyon (pages 215–247)

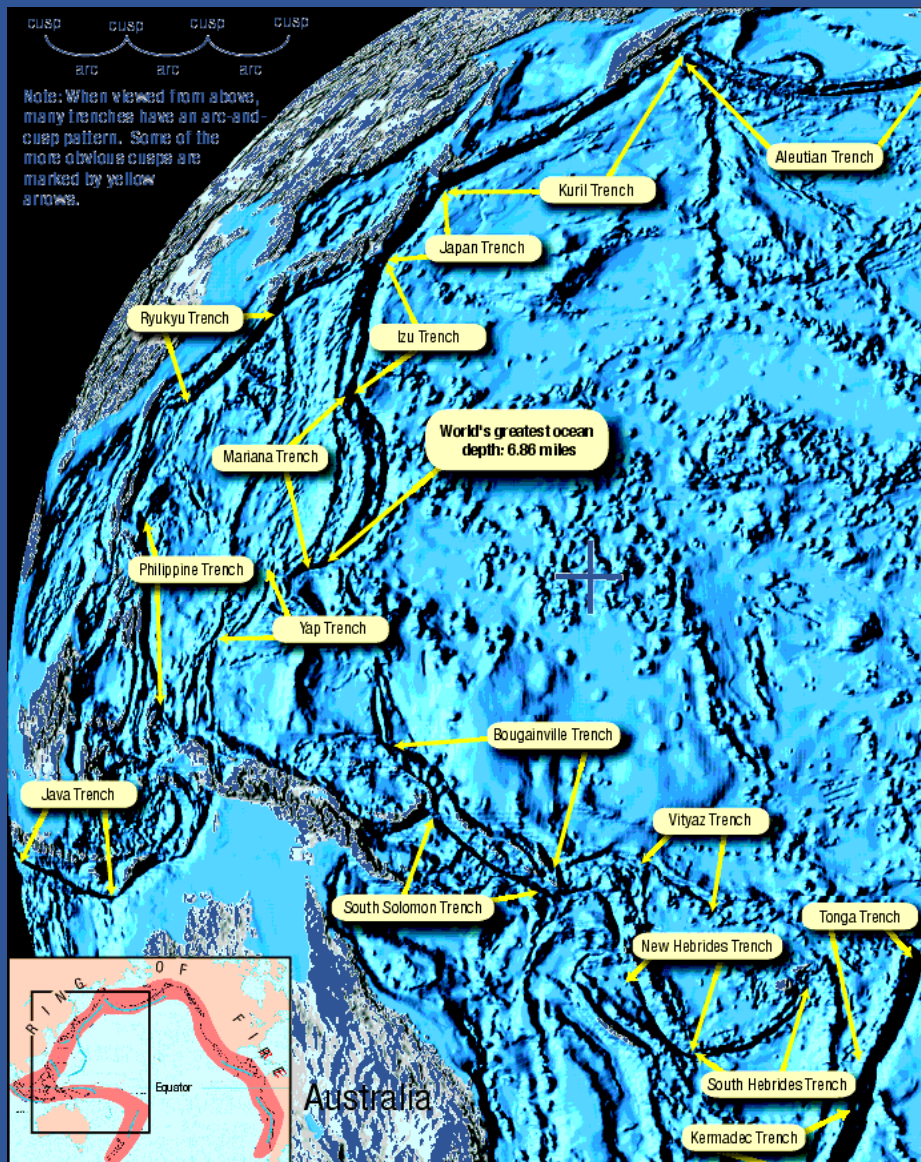

Navajo  
Bridge

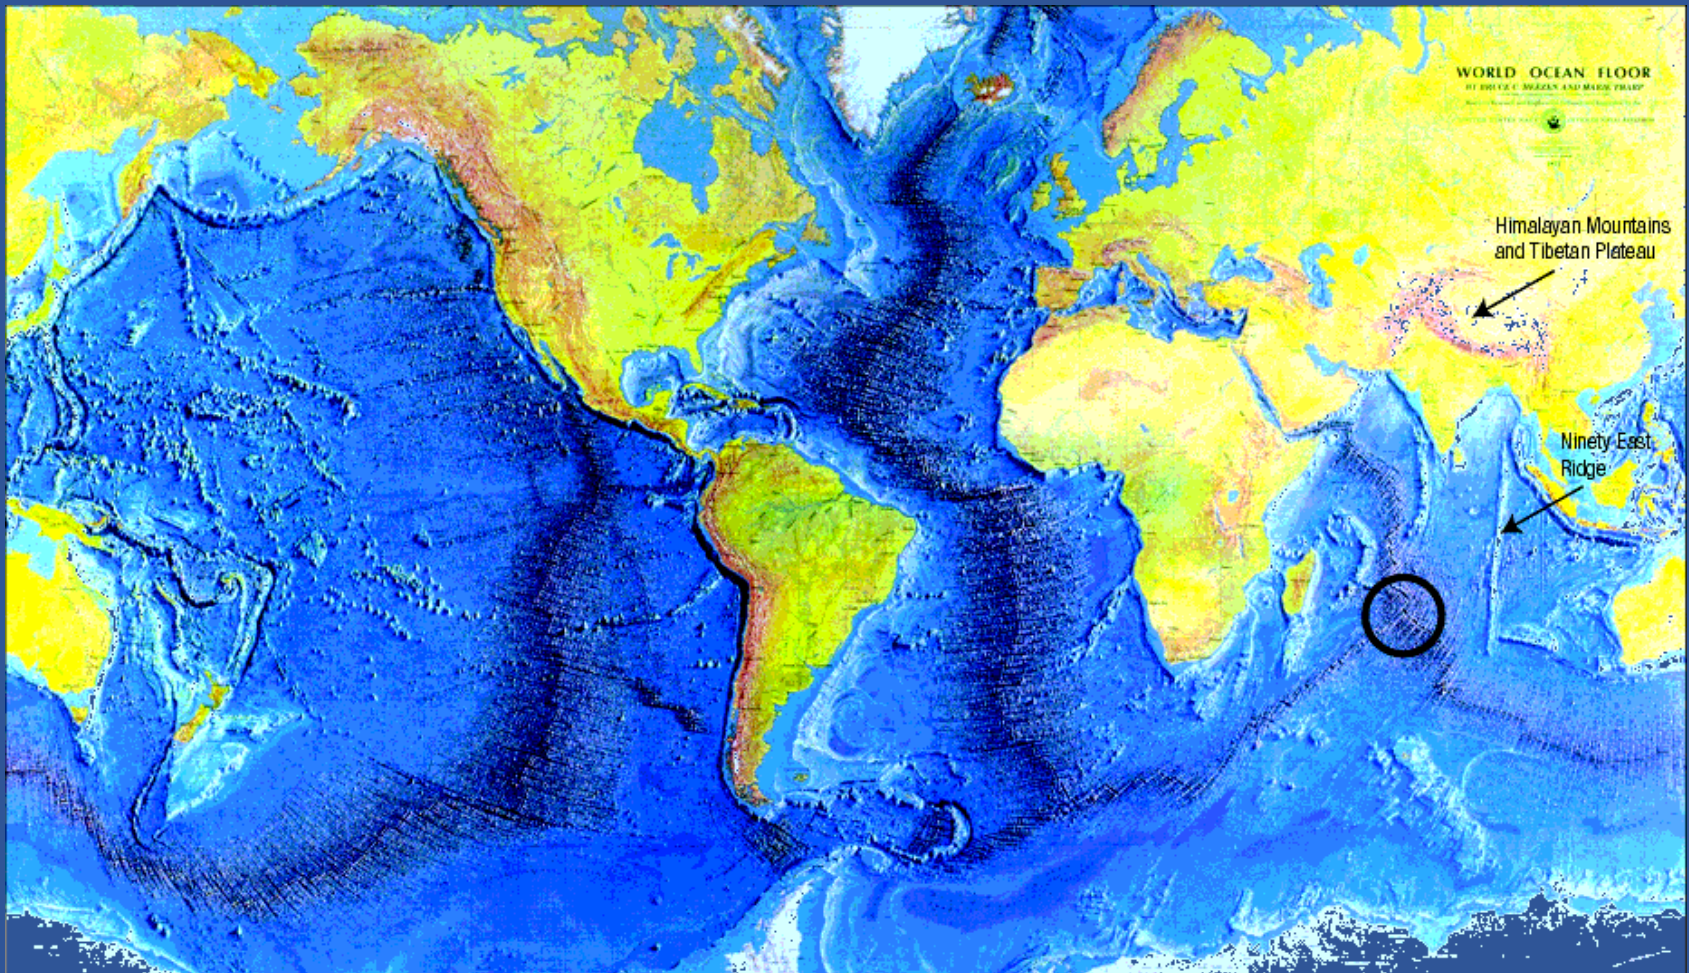

Wayne Ranney, Carving the Grand Canyon: Evidence, Theories, and Mystery (Grand Canyon, Arizona: Grand Canyon Association, 2005)

- “Though scientists have studied the canyon for more than 150 years, a definitive answer as to how or when the canyon formed eludes them. The one thing scientists do agree on is that the canyon was carved by the erosive power of the Colorado River, but the river itself has carried away the evidence of its earlier history.” (back cover)
- “Grand Canyon is somewhat unique among our national parks because of the lack of a single, scientific theory regarding its origin.” Ranney, p. 20.

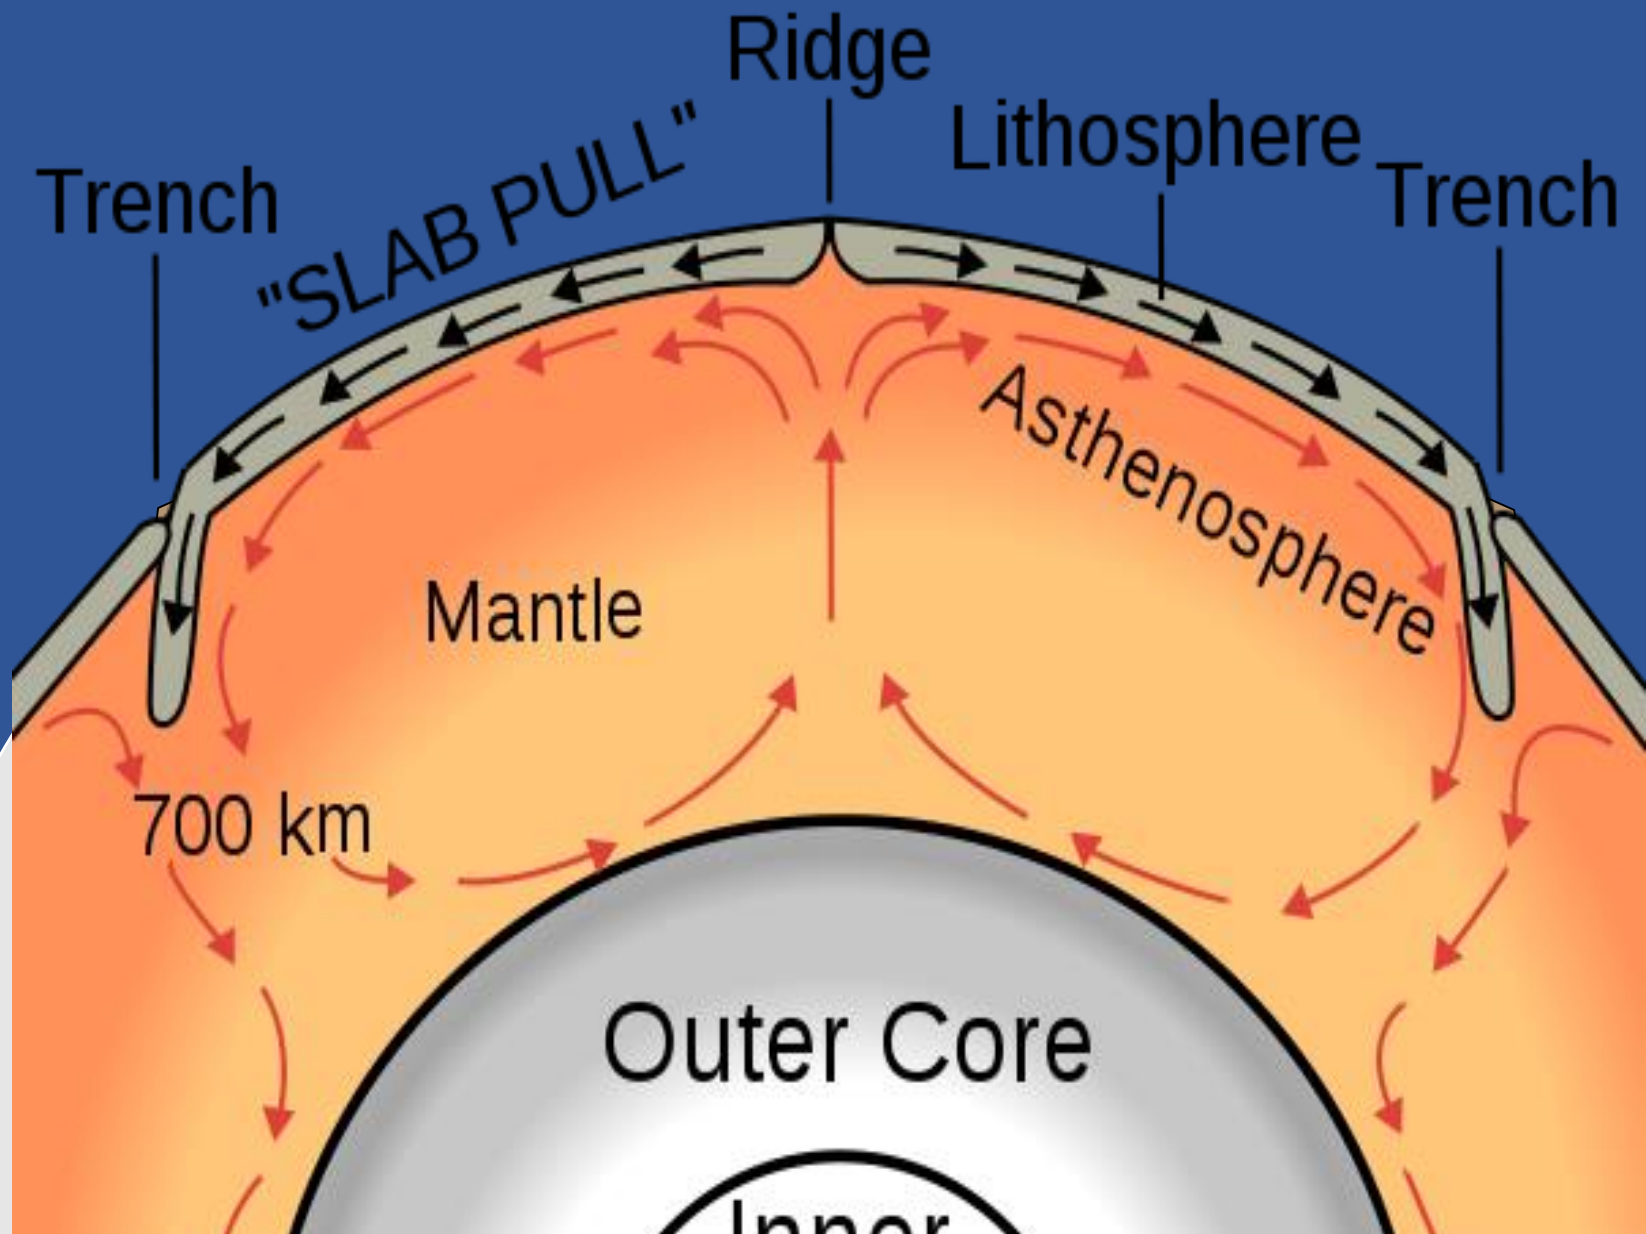

# *Oceanic Trenches, Earthquakes, and the Ring of Fire (pages 153–190)*

46,000 Miles of Ocean Ridge, 15,000 Miles of Trenches = No Sea Floor Spreading

# Mantle Circulation/Convection?

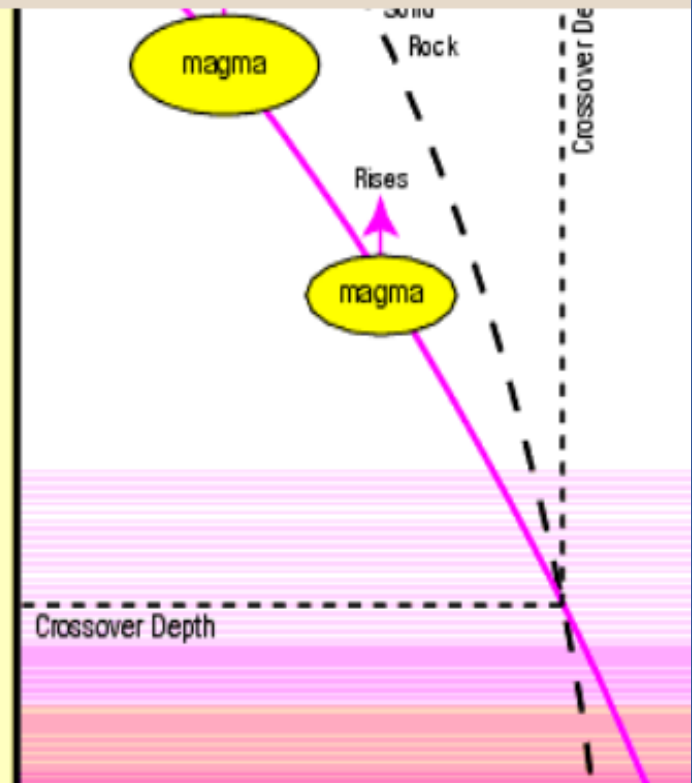

19. “The basaltic magma could not ascend from a position deeper than 200 km in the Earth’s interior.” Satoru Urakawa et al., “Anomalous Compression of Basaltic Magma,” Research Frontiers 2006, p. 114.

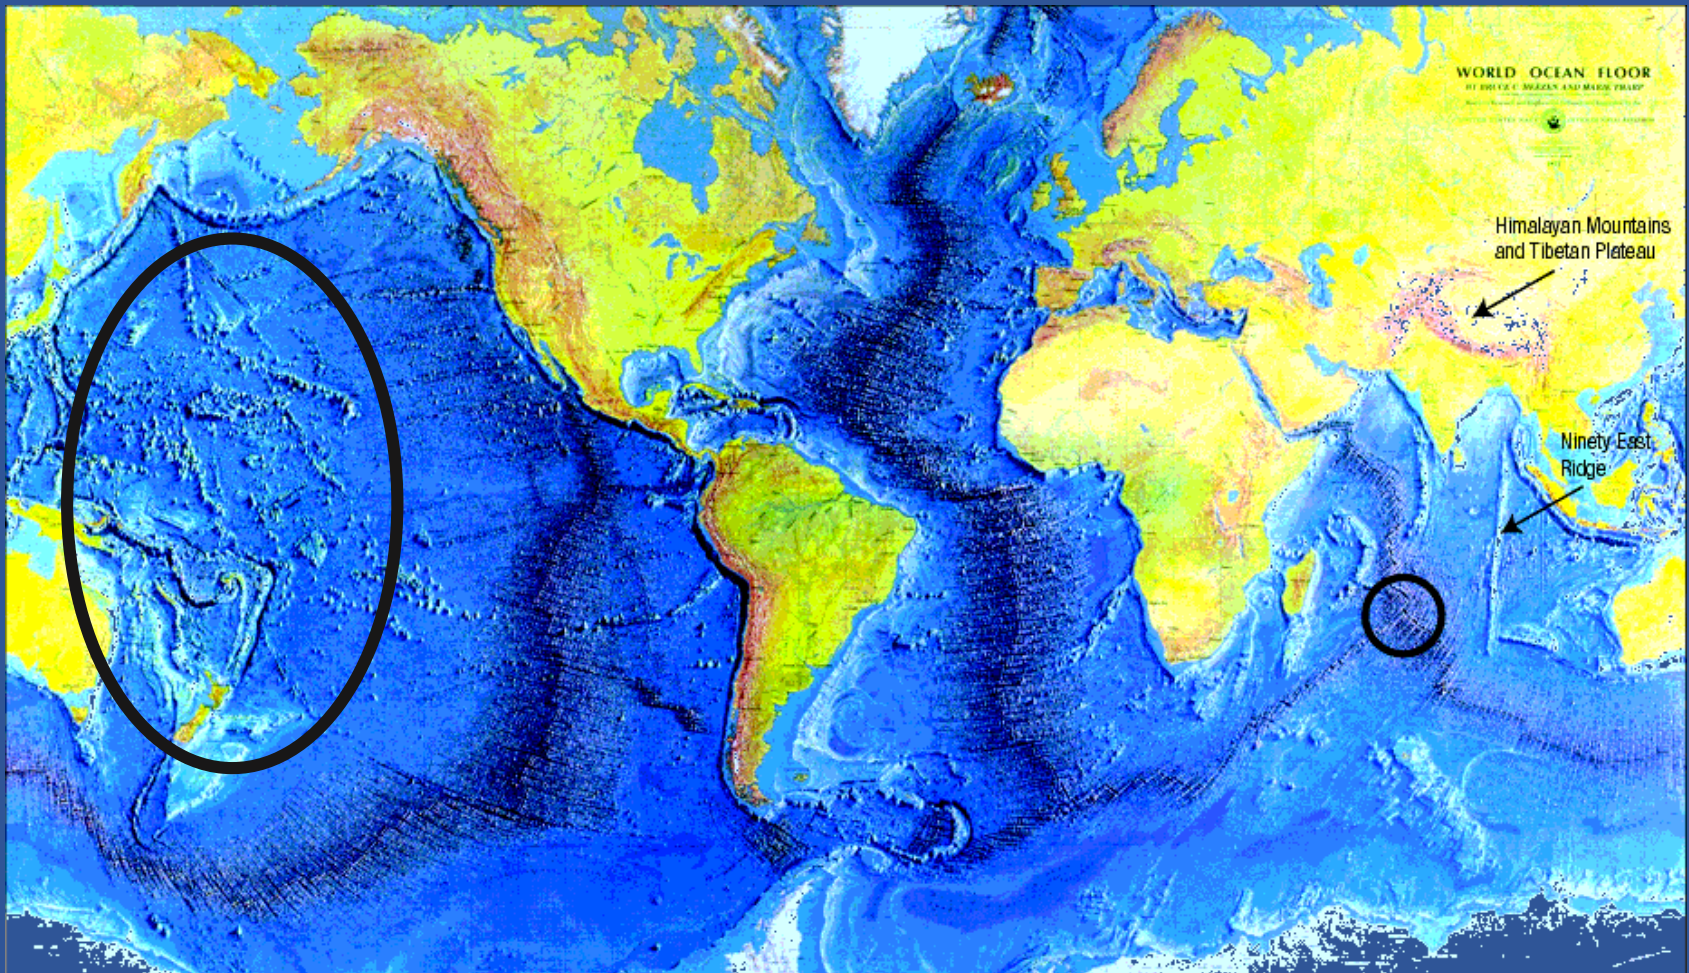

## *In the Beginning: Compelling Evidence for Creation and the Flood*

which it came.<sup>2</sup> Rock that melts under the extreme pressures more than 220 miles below the Earth's surface will contract! At depths of about 220 miles, melted rock occupies nearly the same volume as the original rock. At atmospheric pressure, rock expands by 7-17% (depending on the minerals present) when it is heated and melts. The density where the rock's volume does not change as it melts is called the *crossover density*. Again, it depends somewhat on the minerals present. Because of magma's compressibility, *magma below this depth of about 220 miles is too dense to rise, so magma cannot circulate inside the mantle,*<sup>19</sup> *contrary to what has been taught for 50 years!*

Nor was the mantle ever molten, because it would have expanded as it solidified, placing Earth's crust in such extreme tension that it should have many mile-deep cracks.<sup>20</sup>

49 “In this paper we summarize and reassess a variety of geoscience data sets and show that a substantial part of the southwest Pacific Ocean consists of a continuous expanse of continental crust.” Nick Mortimer, et al., “Zealandia: Earth’s Hidden Continent,” Geological Society of America Today, Vol. 27, March-April, 2017, p. 2.

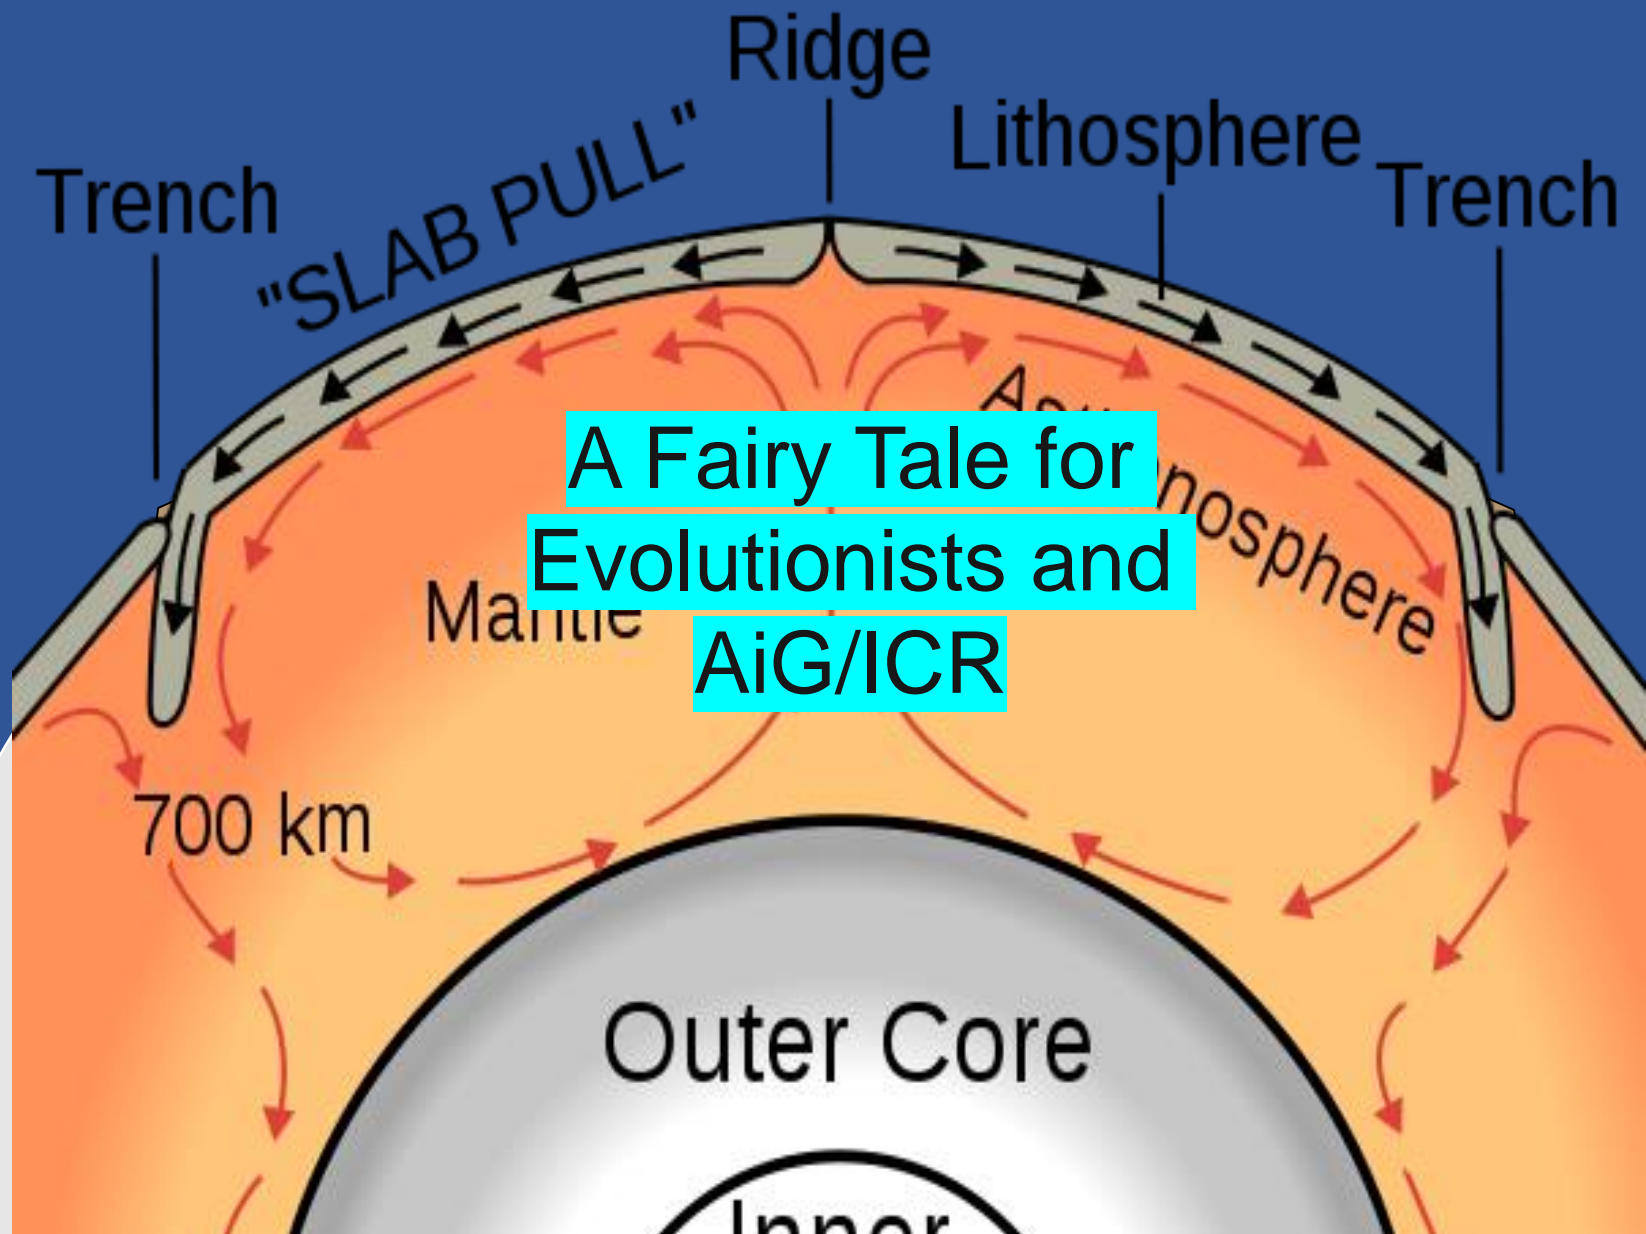

Evolutionary Sea Floor Spreading Plate Tectonics  
and “Creation Science” CPT are a Myth

- 74. “The plume hypothesis survived largely as a belief system and had to be extensively modified to account for unexpected observations.” G. R. Foulger and J. H. Natland, “Is ‘Hotspot’ Volcanism a Consequence of Plate Tectonics?” *Science*, Vol. 300, 9 May 2003, p. 921.
- “The textbook explanation for intraplate volcanism by fixed hot spots is either entirely wrong or insufficient to explain these phenomena.” Anthony A. P. Koppers and Hubert Staudigel, “Asynchronous Bends in Pacific Seamount Trails: A Case for Extensional Volcanism?” *Science*, Vol. 307, 11 February 2005, p. 906.

# Mantle Circulation/Convection?

## Frozen Mammoths (pages 267–298)

- Several ribs, a shoulder blade, and pelvis were broken.<sup>57</sup> Amazingly, the long bone in his right foreleg was crushed into about a dozen pieces, without noticeably damaging surrounding tissue.<sup>58</sup>
- “There had been considerable bleeding between the muscles and the fatty and connective tissues.”<sup>59</sup>
- His shaggy, wirelike hair, some of it 20 inches long, was largely intact.<sup>60</sup>

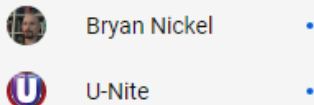

What can we conclude from these unusual details? To crush a slender rod, which the long leg bones resemble, requires axial compression while the rod (or bone) is encased in some material that prevents bending and snapping.

Only the Hydoplate Theory explains how this exact condition would exist during the early days of the flood.

- Liquefaction – Origin of Strata and Layered Fossils (pages 194–204)
- Limestone (pages 259–264)
- Comets (pages 301–336)
- Asteroids, Meteoroids and TNOs (pages 336–363)
- Earth's Radioactivity (pages 378–414)
