

# Climate Lockdowns: New CO<sub>2</sub> Monitoring Credit Card Enables Tracking Of ‘Carbon Footprint on Every Purchase, Monitors & Cuts Off Spending When We Hit Our Carbon Max’ – Mastercard & UN Join Forces

By: Marc Morano - Climate Depot  
September 13, 2021

*Note from Pastor Kevin Lea: We can increasingly discern the methods by which the globalists conspire to seize control of the world by culling the masses and enslaving whoever remains. We now know that Fauci funded the creation of the CoV-SARS-2 engineered virus that was released on the world in late 2019. The globalists, assisted by our governments, medical authorities, and the media, then generated worldwide fear over the so-called “pandemic” to manipulate the masses into submitting to draconian controls that created widespread misery and economic devastation. They then spread the lie that the only way back to normal was to take the “vaccine,” an untested, experimental gene therapy shot, coupled with a global tracking system. Now we see them using vaccine passports to coerce the remaining “vaccine hesitant” by denying them employment and access to the rest of society if they continue to refuse the shot.*

*We also see them fearmongering over another “global” problem – climate change. This time, they are working to mandate a carbon credit card (skipping over the voluntary phase). When fully implemented, the few global elite will be able to reap massive profits and control the buying and selling of those over whom they rule.*

*Neither the vaccine passport nor the carbon credit card is the “Mark of the Beast.” They are, however, setting the stage by putting these digital systems into place. In the future, the world leader (antichrist) will add a requirement for everyone on the planet to take his name on their hand or forehead and bow to his image or their card/passport will be cancelled (Revelation 13:16-18). That **will** be the mark of the beast and all those who take the “Mark” to stay in the system will be damned forever (Revelation 14:9-10).*

*The technical revolution has literally brought us to the doorstep of literal Bible prophecy fulfillment for the first time in 1900 years. Jesus must be coming soon to take His Bride, the Church, to heaven with Him. Are you ready? Is Jesus your Lord and Savior? If not, there is not much time to repent and confess your sins against Him and to call upon His name to receive His forgiveness by faith.*

**The World Economic Forum praised Doconomy. “While many of us are aware that we need to reduce our carbon footprint, advice on doing so can seem nebulous and keeping a tab is difficult. DO monitors and cuts off spending when we hit our carbon max.”**

#

**Climate Depot’s Marc Morano: “This CO<sub>2</sub> monitoring credit card will begin as a ‘voluntary’ measure with no ‘mandate.’ But how long until this CO<sub>2</sub> card will be mandated by big corporations in collusion with governments? Given how the climate activists are aping the COVID lockdowns, expect this credit card to be mandatory under a ‘climate emergency.’” See: [Journal Nature: COVID lockdowns are key to begin ‘personal carbon allowances’: ‘Restrictions on individuals...that were unthinkable only 1 year before’ have us ‘more prepared to accept tracking & limitations’ to ‘achieve a safer climate’](#)”**

Get ready for a Chinese-style social credit system scoring when it comes to your personal spending habits and how they impact “climate change.” A new credit card called Doconomy, has launched that is “working in tight collaboration with Mastercard” and an alliance with the UN Framework Convention on Climate Change (UNFCCC) is now available so you can monitor your personal CO2 budget on every purchase you make.

The new CO2 monitoring Mastercard called Doconomy debuted in order to enable “all users to track, measure and understand their impact by presenting their carbon footprint on every purchase.” The credit cards feature the slogan on them reading “DO. Everyday Climate Action” and have a personal pledge on the rear of the card boasting: “I am taking responsibility for every transaction I make to help protect the planet.” The Mastercards feature the UN Global Climate Action logo on them as well.

The World Economic Forum praised Doconomy. “While many of us are aware that we need to reduce our carbon footprint, advice on doing so can seem nebulous and keeping a tab is difficult. DO monitors and cuts off spending, when we hit our carbon max,” the World Economic Forum wrote on the Doconomy CO2 monitoring website.

The Doconomy credit card website explains: “With fat, sugar and salt levels labeled on food we buy, why shouldn’t our CO2 emissions be just as visible?” asks the Doconomy website. “This type of information shouldn’t be a premium or luxury that consumers pay for, but rather an essential part of every shopping journey.” The website details how the credit card will help consumers “understand their impact by presenting their carbon footprint on every purchase.”

Mathias Wikström, the CEO of Doconomy, explained, “Reducing carbon emissions needs to be prioritized by all parties. At Doconomy we are proud to engage and educate around our lifestyle’s impact on the planet...The financial sector has developed a tremendous efficiency. Now that same force can address the planetary fragility.”

This new CO2 monitoring credit card follows on the heels of the new study in the Journal Nature in August 2021 calling for “personal carbon allowances” that would monitor individuals’ CO2 emissions through smart meters and tracking apps.

Doconomy’s new CO2 monitoring card boasts that it has started “providing 90 million consumers with carbon footprint insights.” The credit card was launched with the aim of “educating all consumers around climate impact information as a first step towards driving awareness around the climate crisis.” The Doconomy CO2 credit card website claims it is the “largest initiative ever taken by a bank in educating its users on the impact of consumption.”

“Working in tight collaboration with Mastercard, setting a global standard for carbon calculations on everyday transactions, and other frontrunners like Klarna in banking, Doconomy aims to reach 1 billion users by COP26 in November,” the Doconomy CO2 credit card website explains...
