

Pfizer exec confesses vaccine never even tested on stopping transmission

Lawmaker: ‘Get vaccinated for others was always a lie’

***CCPO Note:** It is now obvious to everyone that the COVID-19 “vaccines” are ineffective - many or most people who took the injection subsequently contracted the disease. As this article reports, Pfizer now admits that they did not even test for transmission control before deployment. In other words, our “leaders” overtly lied when they claimed that the “vaccines” were “100% effective” at stopping the spread of COVID-19. And this lie became the justification for the oppressive vaccine mandates / passports that disrupted our world and cost us all so much – many their livelihoods, others their health, and still others, their very lives. This is more incontrovertible proof that we **cannot** trust our governments, health agencies, the health industry, or our medical establishment.*

These injections were rolled out under Emergency Use Authorizations, and therefore, the manufacturers were not required to disclose their contents. But we now also have a growing body of scientific research from around the world that reveals that the injections contain graphene oxide and other components that U.S. patents refer to as bioweapons (<https://usawatchdog.com/7-different-patented-poisons-in-cv19-injections-karen-kingston/>). We see people getting sick and dying at a rate far exceeding the normal baseline (<https://expose-news.com/2022/06/23/life-insurance-176percent-increase-payouts-deaths-2021/>). In fact, the State of Florida Surgeon General is now recommending against the injections for young men, given the high rate of heart disease and heart-related deaths in those that have taken the shots (<https://www.floridahealth.gov/newsroom/2022/10/20220512-guidance-mrna-covid19-vaccine.pr.html>). But the federal government and medical establishment continues to push the “vaccines” and “booster” shots. Again, we cannot trust our governments, health agencies, the health industry, or our medical establishment. They have an agenda that has nothing to do with our welfare.

*However, we **can** trust the One Who said, “I am the Way, the Truth, and the Life” (John 14:6). He **does** have our welfare in mind. In fact, He (Jesus) gave His life that we might live when we repent and believe in Him (John 3:16).*

Undermining the premise for mandates and “passports,” a Pfizer executive admitted to the European Parliament on Monday that her company’s vaccine was never tested during clinical trials for the ability to prevent transmission of COVID-19. Janine Small, Pfizer’s president of international developed markets, was asked by Dutch MEP Rob Roos if the pharmaceutical giant had tested the vaccine “on stopping the transmission of the virus before it entered the market.” “No ... you know, we had to really move at the speed of science to really understand what is happening in the market,” she confessed. Roos later posted a video on Twitter of Small’s response and added his own comment.

“This is scandalous!” he said. “Millions of people worldwide felt forced to get vaccinated because of the myth that you do it for others.” That claim, he said, has “turned out to be a cheap lie.” He pointed out in a tweet that the purpose of the COVID passport required by many countries was to force people to get vaccinated. “The world needs to know,” he wrote...
