CCPO Note: *This article reports that several global banks, in partnership with the Federal Reserve (same thing) will soon implement a 12-week pilot test of a digital dollar, following on the heels of Biden’s Executive Order 14067, which implements a digital currency in the U.S. This in turn helps put in place the global framework that will indeed enable the Antichrist to someday cause “all, both small and great, rich and poor, free and slave, to receive a mark on their right hand or on their foreheads, and that no one may buy or sell except one who has the mark or the name of the beast, or the number of his name” (Revelation 13:16-17). The speed at which the globalists are proceeding with preparations to implement their “Great Reset” is breathtaking. Normal is not coming back, but Jesus is! Are you ready? If you are unsure, please see “Normal” isn’t coming back, Jesus is” (calvarypo.org/normal-isnt-coming-back-jesus-is-are-you-ready/) or contact us (calvarypo.org/contact/).*

Are you ready for the government to monitor what you buy and sell on a daily basis? Because that is what could happen if you start using the new “digital dollar” that they are now testing. Of course using the new “digital dollar” would be voluntary at first, but what if it eventually becomes mandatory? The use of physical currency continues to decline year after year, and some governments in Europe have already taken radical measures to phase out the use of cash. Many among the elite consider digital currencies to be the key to a whole new era of strict governmental control over the way that we live our lives, and there would be so much potential for abuse.

On Tuesday, an extremely ambitious 12 week test of the “digital dollar” was publicly announced. As you can see, some of the biggest companies in the financial world [are participating](#)... “Global banking giants are starting a 12-week digital dollar pilot with the Federal Reserve Bank of New York, the participants announced on Tuesday. Citigroup Inc, HSBC Holdings Plc, Mastercard Inc and Wells Fargo & Co are among the financial companies participating in the experiment alongside the New York Fed’s innovation center, they said in a statement. The project, which is called the regulated liability network, will be conducted in a test environment and use simulated data, the New York Fed said.”

When asked about his firm’s participation in the project, a Citigroup executive [sounded very enthusiastic](#)... “Programmable US dollars may be necessary to support new business models and provide a foundation to much-needed innovations in financial settlements and infrastructure,” Tony McLaughlin, managing director for emerging payments and business development at Citigroup’s treasury and trade solutions division, said in a statement. “Projects like this, that focus on the digitization of central bank money and individual bank deposits, could be expanded to take a broader view of the opportunity.”

This is something that the Federal Reserve has been working on for a long time. Back in January, the Fed released a [“much-anticipated discussion paper”](#) on the possibility of a “digital dollar”, and they invited the public to comment on the paper for four months... “In January, the Fed [took a first step](#) toward weighing the use of a central bank digital currency when it released its much-anticipated discussion paper and opened a four-month public comment period to receive input. The paper said that... \
