Former British Prime Minister Tony Blair said that global "digital infrastructures" are needed to monitor who is vaccinated as he predicted a "slew" of new vaccines to be introduced to the world in the next few years.

CCPO Note: COVID-19 provided the opportunity for the globalists to deploy an untested, experimental "vaccine" leading to the initial deployment of a digital vaccine passport system in several countries. Then came an apparent lull in this pressure – the mandates and passport requirements were relaxed or eliminated as a result of court rulings, public protests, and the no longer hidden reality that the injections do nothing to stop the spread of COVID. Here is more evidence that this lull is almost over.

*As this article reports, former UK Prime Minister Tony Blair, speaking at the World Economic Forum 2023 conference in Davos is another world leader calling for a global digital tracking system for vaccines and programming the masses to accept such a system under the guise of "public health." (See also SGT article here.) The resultant system will require only a "flip of the switch," as Calvary Chapel Kaneohoe Pastor and prophecy teacher JD Farag says, to become the universal, bio-digital control and monitoring system that the future antichrist will hijack for his own purposes by causing "**all, the small and the great, and the rich and the poor, and the free men and the slaves,** to be given a mark on their right hand or on their forehead, and he provides that no one will be able to buy or to sell, except the one who has the mark, either the name of the beast or the number of his name" (Revelation 13:16, 17). Those who refuse will be executed.*

That we are witnessing the rollout of this technology, along with many other "signs of the times," reveal that we are fast approaching a future seven-year period in human history often referred to as the Tribulation Period. Christians know that Jesus will appear to take us to be with Him before this time. Will you be one? If you are unsure, please see "Normal" isn't coming back, Jesus is" (calvarypo.org/normal-isnt-coming-back-jesus-is-are-you-ready/) or contact us (calvarypo.org/contact/).

Appearing at the annual World Economic Forum meeting in Davos, Switzerland, Iraq War architect and former Labour Party Prime Minister Tony Blair said that even though the Chinese coronavirus has subsided in the public mind, governments must continue to develop digital tracking systems for vaccines, including for unspecified jabs for the "world's most dangerous diseases."

"You need the data, you need to know who has been vaccinated and who hasn't been. Some of the vaccines that come online will be multiple shots… so you've got to have a proper digital infrastructure and most countries don't have that," the former British prime minister said. "I think there is a huge impetus for a national digital infrastructure, digitisation in healthcare is one of the great game changers, we should be helping countries develop a national digital infrastructure, which they will need with these new vaccines," he added, revealing that he has been lobbying the G20 nations to adopt this approach.

Mr Blair lamented that …
